

SPS: VISION 2030

MINISTRY FOR DEVELOPMENT OF
ECONOMY, TRADE AND AGRICULTURE
OF UKRAINE

Vision: Ukraine is a reliable producer and exporter of safe & healthy agricultural products and foods

Strategic aim

Create conditions for production and placing on the market of safe food products

Strategic goals

1. Reduction of risk of food poisoning related to food safety

Create conditions to ensure an appropriate level of phytosanitary safety

- 1. Effective prevention of introduction and spread of pests.**
- 2. Full transparency of phytosanitary measures.**
- 3. Safe and sustainable use of plant protection products.**
- 4. Effective system of state control.**

Create conditions to ensure proper animal health and welfare

- 1. Effective prevention of introduction and spread of infectious animal diseases.**
- 2. Prevention of the spread of antibiotic resistance among animals.**
- 3. Animal welfare.**

State Policy

AS-IS

- ✓ **Partially outdated, imperfect and not fully harmonized legislation.**
- ✓ **Lack of effective mechanisms to ensure the proper level of sanitary, phytosanitary and anti-epizootic situation in Ukraine.**

RECOVERY

- ✓ **Mechanisms have been adopted to prevent the introduction and spread of plant pests and infectious animal diseases.**
- ✓ **Hygienic requirements for the production of food and feed, and appropriate traceability procedures have been introduced.**

TO BE

- ✓ **Modern and systemic legislation has been adopted.**
- ✓ **Conditions for the production of safe and healthy agricultural and food products by market operators have been created.**
- ✓ **An adequate level of sanitary, phytosanitary and epizootic situation in Ukraine has been ensured.**

Deregulation

AS-IS

- ✓ Excessive bureaucratic burden in terms of procedures of registration, obtaining of permits and burdensome government regulation.

RECOVERY

- ✓ The procedures for obtaining permits have been simplified.
- ✓ Mechanisms for delegating of certain state functions.

TO BE

- ✓ Lack of excessive regulatory pressure on business.
- ✓ Business has the opportunity to receive all services in terms of registration procedures, obtaining permits online.

Strengthening Institutional Capacity

AS-IS

- ✓ **Non-efficient system of public administration, lack of qualified personnel and lack of modern material and technical equipment.**

RECOVERY

- ✓ **Public authorities are provided with adequate resources for the effective performance of their state functions.**
- ✓ **Conditions have been created for effective control at the border when importing goods covered by sanitary and phytosanitary measures.**
- ✓ **35 EU-compliant border inspection posts have been set up.**
- ✓ **Authorized laboratories according to ISO 17025.**
- ✓ **The level of qualification of employees of public authorities and state institutions has been improved.**

TO BE

- ✓ **The state provides quality services.**

Digitalization and Transparency

AS-IS

- ✓ Lack of modern IT systems and technologies to provide state services and state control.
- ✓ The vast majority of permit documents are issued only in paper form.
- ✓ Registers are maintained without the use of modern automated IT platforms.

RECOVERY

- ✓ Simple and easy to use website of the state body with technical capabilities to provide services online.
- ✓ All registers are built on a single platform with possibility of interconnection with any other state registers.
- ✓ The electronic system for issuing permit documents.
- ✓ An electronic system for early notification of the use of plant protection products.
- ✓ RASSF.

TO BE

- ✓ The concept of "state in a smartphone" has been implemented and all possible services have been digitalized.

State Control

AS-IS

- ✓ Non-efficient mechanism of state control.
- ✓ No mechanism to prevent violations of law.
- ✓ Insufficient consultations and lack of preventive work with business.

RECOVERY

- ✓ A multi-annual national plan of state control has been introduced.
- ✓ The IMSOC has been created.
- ✓ Mechanisms have been introduced to prevent violations through counseling, training and assistance in compliance with the law.

TO BE

- ✓ Awareness of operators and consumers of legal requirements.
- ✓ The number of violations of the law has been reduced.
